

Holiday Homework-IV

Dear Parents,

As fables and children's stories, children's movies are an excellent tool for educating them. They can be very useful to show children different cultures, to teach them history, accustom them to fundamental values, show them how to think.....all in a simple and entertaining way.

Usually, for children, it is considered to be more important to create a love of reading, which in many ways is correct. Movies however, are an excellent option to compliment a child's education. Both audio and visual media are great ways to capture a child's attention and slowly introduce new ideas and contents.

Given below is a list of movies watch it with your children. They will love them.

1. He Named Me Malala

- <https://youtu.be/zt0NkL9J8jk>

2. I Am Kalam (In hindi)

- <https://youtu.be/NGPINfi2ExY>
